

PAUL UWAIFO

Lagos, 100001 Nigeria | +2347056610132 | uwaifopaul1@gmail.com

Summary

IT Support Specialist and Frontend Developer with 4+ years of experience in IT infrastructure, network administration, and modern web development. Proven expertise in React.js, Next.js, TypeScript, Node.js, and system troubleshooting. Experienced in reducing downtime, resolving technical incidents, and building scalable, user-focused web applications. Strong background in cloud tools, cybersecurity fundamentals, and digital transformation.

Technical Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, RESTful APIs, EJS Templating
- Databases: MongoDB, PostgreSQL, MySQL, TypeORM, Redis (for caching and session management)
- Tools & DevOps: Git, GitHub, npm, Webpack, Postman, TablePlus, cPanel, DirectAdmin, Agile Methodologies
- Other: Responsive Design, Cross-Browser Compatibility, Performance Optimization, AI Integration (OpenAI, Anthropic), Object-Oriented Programming (OOP), WebRTC, Three.js
- IT Infrastructure: Network Administration, System Testing, Hardware Repair, Zoho Workspace, Spiceworks, Microsoft Office Suite Tools, Odoo ERP, Git, GitHub, npm, Webpack, Postman, TablePlus

Professional Experience

AI Developer

Opendashboard — Remote | January 2025 – December 2025

- Built scalable backend systems using Express.js and TypeScript, enabling seamless API communication that supported high daily requests.
- Developed intelligent, server-rendered interfaces with Next.js, enhancing application responsiveness and user engagement.
- Integrated OpenAI and Anthropic models to power conversational and generative AI features across key modules.
- Designed and managed relational data structures with MySQL and TypeORM, enabling efficient data access and persistence.
- Collaborated with cross-functional teams to design, test, and deploy AI-driven solutions, aligning with business goals and accelerating project delivery by 2 weeks on average.

Fullstack Developer

Zentedge Solutions — Remote | January 2023 – September 2023

- Developed backend services with Node.js and Express.js, integrating PostgreSQL databases to manage data for applications serving a high number of users.
- Created dynamic server-rendered UIs using EJS and vanilla JavaScript, improving load times by 25% through optimization techniques.
- Handled server configuration and deployment via cPanel and DirectAdmin, maintaining 99% uptime across production environments.
- Administered databases with TablePlus and implemented Redis for caching, reducing query response times by 40%.

Software Development Intern

Cophild — Lagos, Nigeria | January 2022 – July 2022

- Built interactive web pages using HTML5, CSS3, JavaScript, and Bootstrap, contributing to projects that increased user satisfaction
- Applied foundational software logic, OOP in Java, and Python scripting, completing tasks that supported team deliverables ahead of schedule.
- Collaborated on group projects using Git for version control and agile practices, delivering 5+ features with zero major bugs.
- Earned certifications in Python, Java, and Web Development, ranking among top-performing interns.

Frontend Developer

Freelance Projects - Geescollect E-commerce

- Built scalable UI components with React.js, Tailwind CSS, and TypeScript, enhancing site responsiveness for mobile users by 30%.
- Implemented client-side routing and state management using React Router, Zustand, and Redux Toolkit, supporting real-time data flows for 100 + daily visitors.
- Integrated REST APIs and Firebase for authentication and data handling, reducing login errors by 15% and improving security.

IT Support officer

Pinnah Foods — Lagos, Nigeria | May 2025

- Utilized Zoho Workspace for collaboration and task management, streamlining team workflows and reducing communication delays by 25%.
- Managed IT support tickets via Spiceworks, approving, resolving, and closing an average of 50 tickets per month with a 95% satisfaction rate.
- Maintained the organization's network server, ensuring 99.9% uptime and resolving connectivity issues for 100+ users.
- Handled hardware repairs and system maintenance, extending device lifespan and cutting replacement costs by 15%.
- Used Odoo to investigate and resolve unclosed POS sessions and requisition issues, including transaction reconciliation, approval flow correction, and process optimization.

IT Support Technician & Digitalization Assistant

Lush Hair — Lagos, Nigeria | January 2024 –January 2025

- Resolved an average of 20+ hardware, software, and network support tickets weekly, maintaining a first-response time under SLA and minimizing operational downtime.
- Supported digitalization initiatives by deploying systems that transitioned manual operations to digital, increasing operational efficiency by 30%.
- Configured and repaired PCs, installed software, and ensured secure network connections, minimizing downtime by 25%.
- Conducted system maintenance and backups, safeguarding data for 200+ users and preventing potential losses.
- Facilitated training for new digital tools, onboarding 100+ employees and enhancing team productivity by 15%.

Selected Projects & Relevant links

Frontend Developer — NextVerse (Personal Project)

Technologies: Next.js, React.js, Shopify Drag and Drop, Three.js, WebRTC, API Integrations

- Developed a mood recognition model using WebRTC and system cameras, achieving 85% accuracy in real-time detection.
- Built a custom drag-and-drop library with Shopify, enabling intuitive UI customization for users.
- Created a simple 3D model game with Three.js.
- Integrated three APIs: Weather, Dog, and Food for dynamic content display.
